Mr. Noyes & Ms. Hynson,

Please be advised that NRG MD Ash, LLC, has detected Appendix IV constituents at a statistically significant level (SSL) over the groundwater protection standard (GWPS) in downgradient compliance monitoring wells at the Westland Ash Management Site Cell B located in Dickerson, Maryland. Statistical analysis of sample results was completed by September 4, 2018.

Per 40 CFR Part 257.95, a report detailing the specific constituents and levels was posted in a CCR document in our Operating Record by October 4, 2018, and the notice will also be posted to the public website; <https://www.genon.com/ccr-rule-compliance-1/>.
